ZO® Professional Peels

Dr. Obagi's signature chemical peels rejuvenate your skin. (in-office medical treatments)

ZO® 3-STEP PEEL™

(Professional Use Only)

This 3-Step Peel™, designed by Zein Obagi MD, will reveal brighter, smoother, and tighter looking skin with minimal downtime and only mild peeling for up to 5 days. This peel is safe and suitable for any skin type or color. Visible improvement is seen with one treatment; however, a series of treatments can be repeated every 3-4 weeks for deeper repair.

This unique peel not only works to exfoliate dead skin cells on the outer surface of the skin, but also works in the deeper layers to boost collagen production, improve elasticity, diminish lines and wrinkles, and reduce irregular skin pigmentation. Lastly, it works to restore hydration, enhance the skin's protective barrier and prevent future damage.

Step 1 Peel Solution

17% salicylic acid, 10% trichloroacetic acid, 5% lactic acid

Step 2 Retinol Crème

6% retinol

Step 3 Calming Crème

Post Procedure Skin Relief

For the improvement of:

- Fine lines and wrinkles
- Firmness and elasticity
- Irregular skin pigmentation
- Dull or rough skin texture
- Sun damaged skin, sunspots, dark patches
- Acne or acne scars

ZO® MEDICAL

BY ZEIN OBAGI, MD

ZO® CONTROLLED DEPTH PEEL™

(Professional Use Only)

This advanced peel resurfaces the skin at a deeper level. It is designed to tighten and regenerate the skin while dramatically improving the appearance of deeper lines and wrinkles, irregular skin pigmentation including melasma, and smooth skin's texture, including scars. For optimal results, condition the skin 6 weeks prior to the peel following the ZO® Multi-Therapy Hydroquinone System.

This peel uses trichloroacetic acid (TCA) mixed with a base that allows your provider to tailor the depth of the peel to treat your specific skin condition. Peeling, redness, and irritation are normal and can last up to 7-10 days. This peel is suitable for most skin types and colors. Dramatic results will be seen with one treatment, but some patients require 2-3 peels repeated every 2-3 months for maximum benefits.

For the improvement of:

- Deep lines and wrinkles
- Firmness and elasticity
- Melasma (epidermal and dermal)
- Rough uneven texture (large pores and scars)
- Photodamage (elastosis, lentigo, actinic keratosis)
- Acne and acne scars
